Siemens IT Services

A Constantly Advancing Industry

With constant advancements in technology, medical equipment has the potential to provide a higher quality of care than ever before. In order to realize clinical and financial objectives in this day and age, it's necessary to have professional software and IT services you can depend on.

Staying a Step Ahead

At Siemens, our IT Services supports your efforts to make sure your facility doesn't just keep pace with technological advancements but stays a step ahead of them. In particular, IT Services is designed to:

- Deliver faster results
- Provide continuous software innovation and availability
- Optimize clinical and business processes

IT Care Plan Extended Service Agreement

Our IT Care Plan is more than just a service agreement. It's a complete service program that will help your syngo® system and departmental staff reach their full potential—day after day, month after month, year after year.

In order to support your facility and your syngo products, our IT Care Plan provides:

- A Primary Contact
- Application Support
- Fast Response Time
- System Monitoring
- Updates and Upgrades

Through the IT Care Plan, our mission is to help you ensure the imaging and IT systems at your site are always connected and optimized, enabling your staff to work more efficiently and intelligently while possessing the highest degree of workflow flexibility.

Clinical Consulting

Our expert clinical consultants work closely with your staff to recommend technology initiatives as well as provide guidance on making technology-enabled clinical workflows more efficient and productive.
